The difference. The edge.

Poker**Coach** FAQs

How to locate the hand histories of your Poker room/ network.
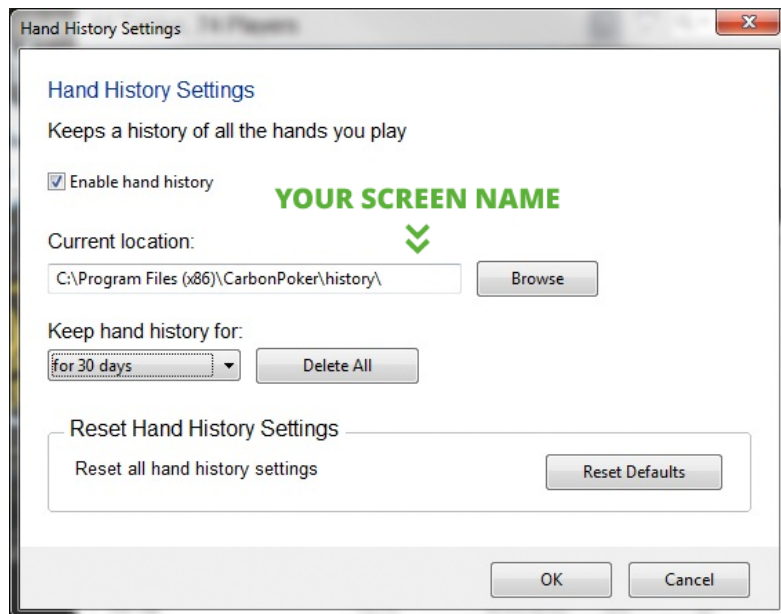

Revolution Poker Network

(example skin: Cake)

The default storage location for hands played on the Revolution Poker Network is as follows:
C:\Users\<UserName>\AppData\CPN\<SkinName>\HandHistory
"Options" – "Hand History"

Merge Poker Network
(example skin: Carbon)

"Settings" – "Hand History Settings"
Make sure the "enable hand history" checkbox is marked

iPoker Network
(example skin: Everest)

The default storage location for hands played on the iPoker Network is as follows:
C:\Poker\<SkinName>\history+subfolders
PokerCoach imports all NL Holdem cash game hands including iPoker's fast fold poker "Speed Hold'em".

In the client itself the user can access his hands under "Menu - My Account - Cash Table History"

If the hands don't show up there, one needs to go to the hand section in the client, select a table and then click on "Update local information".

Microgaming (MPN) Poker Network
(example skin: Ladbrokes)

MPN saves the hand history in a file named "GameHistory.dat" which cannot be read by PokerCoach. The workaround is to follow the following steps:

- Go to Menu - My Account – Hand History in the client (other MPN skins may have a different menu).
- Select the required hands (NL Holdem cash-game only!) according to the available options
- Highlight the required hands
- Click on the "Export and History" button
- Assign a file name and then save that file in .txt format which is then readable by Poker-Coach.

"Menu" – "My Account" – "Hand History"

888poker

The default storage location for hands played on the 888 poker network is as follows:
C:\Users\<UserName>\AppData\Roaming\<SkinName>\HandHistory
In the software client one can access the hands under "My Profile – Game History"
Attention : By default hands are not saved. In order to get them saved locally one needs to go to "Settings - Game Settings" and mark the checkbox accordingly.
"Settings" – "Game Settings"

PKR

The default location for hand histories played on PKR is
C:\Users\<UserName>\Documents\pkr\handhistory\<PKRUserName>
There doesn't seem to be an option in the software to change those settings above.

Ongame Poker Network
(here: Red Kings)

The default storage location for hands played on the Ongame Poker Network is as follows:
C:\Users\<UserName>\P5JavaClientSettings\handhistory
PokerCoach imports all NL Holdem cash game hands including Ongame's fast fold poker "Strobe".
There doesn't seem to be an option in the software to change those settings above.
